

Keane Optimum Executive Dashboard

Understand, analyze, and control business dynamics

With the Keane Optimum Executive Dashboard Information System, business critical information is ready on demand.

Business Intelligence on Demand

The Keane Optimum Executive Dashboard puts managers and executives in the driver's seat, helping them make informed decisions. The dashboard takes reporting to a new level by enabling users to quickly gain an accurate snapshot of their organizations' performance, drill down for greater detail, and access key business indicators in easy-to-understand graphs, gauges, and charts. The Keane Optimum Executive Dashboard is a powerful enhancement to your Keane Optimum systems, releasing the wealth of information held within them right from your desktop.

What you want to know, when you need to know it

With Keane Optimum Executive Dashboard, you choose the criteria and the type of view, the dashboard does the rest of the work, presenting results in real time via a Web browser. The customizable console presents key business indicators, such as current accounts receivable (AR) days; total census versus available beds; and patient mix by department, facility, or business unit — trended over time or displayed as a comparison or aggregate of data across an enterprise.

While the dashboard is completely customizable, it comes equipped with several pre-defined views to get you up and running quickly. The Keane Optimum Executive Dashboard's standard template views provide

a well-organized access point to information on revenue cycle performance, financial status, and clinical findings.

Easy tab navigation guides you from one page to the next. Click on a tab to display performance indicators for that discipline. Each indicator view is titled for easy identification. Click on an indicator view to drill down even further using completely customizable parameters.

The ideal solution for large enterprises and small hospitals alike, the Keane Optimum Executive Dashboard offers corporate, regional, and single facility views.

A Web-enabled solution built on a solid foundation

The dashboard can be accessed via Microsoft Internet Explorer or while logged on to your Keane HIS, making it the right solution for both executives and department heads. Built-in security controls grant access to dashboard views based on user login.

The Keane Optimum Executive Dashboard is built on Cyberscience Enterprise Cyberquery (eCQ) technology, Keane's easy-to-use business analysis and reporting solution. The dashboard uses the strength of eCQ behind the scenes to tap into your Keane systems and deliver your data right to your desktop.

Business Intelligence for decision makers:

- » **Healthcare Executives:** Receive an instant snapshot of your organization's performance
- » **Directors:** Get an overview of department or business unit performance, plus drill down for details
- » **Clinicians:** Personalize the way you receive information with multiple views of pertinent patient information on a single screen

Revenue Cycle Management (RCM)

The RCM Console offers business critical views of business office, admitting, and accounts receivable performance.

- » Admitting views
- » Total census vs. available beds

- » Census by nursing station
- » Work queue by reason code
- » DNFB by patient class
- » Business office views
- » MTD/YTD cash collected
- » MTD/YTD bad debt write-off
- » Current AR days outstanding
- » Current credit balances
- » Current DNFB
- » Current unbilled AR
- » AR views
- » Net account receivable
- » Third party aging %
- » Open AR by payor
- » Cash received by payor
- » Cost to collect
- » Denials of revenue

Financial Management

The Financial Console can display key indicators for accounts payable, general ledger, materials management, and other financial

information populated from Keane applications views.

- » Operational profits
- » Expense actual vs. budget
- » Income actual vs. budget

Clinicians

The Clinicians Console can display individual physician census or aggregate data for multiple physicians based on login views.

- » Patients admitted with admitting diagnosis
- » Recent discharges
- » Patient mix — inpatient vs. outpatient
- » Lab results over 24 hours
- » Medication renewals

Keane Optimum

The Keane Optimum product suite serves the needs of the entire healthcare organization, enhancing revenue cycle management, improving patient care, and driving staff productivity. Keane Optimum includes a full suite of integrated financial and clinical applications to simplify the management of the entire healthcare IT environment. This drives down maintenance and support costs, and eliminates headaches for those managing patient admission, finances, scheduling, and clinical records.
