

## Keane Optimum RCM

By providing a single, accurate source of information across the enterprise, Keane Optimum helps hospitals of all sizes increase revenue and cash flow, reduce AR days, improve operations, and enhance the revenue cycle process. Highly rated by industry experts, Optimum RCM helps organizations navigate the complex third-party managed care contracts by supporting sophisticated reimbursement schemes, reporting requirements, and expected payment modeling for payer negotiations.

**Improved Productivity.  
Greater Accessibility.**

## Comprehensive Patient Management

### Improved Productivity

Optimum RCM offers unparalleled user flexibility. It provides real time, secure access to vital patient information, which is presented in a fully customizable display and sequence, for both onsite and remote staff. The system can adapt to each individual's preferences and workflow, rather than forcing employees to adapt to the system. This allows for marked improvement in efficiency and productivity.

### Greater Accessibility

Web technology affords Optimum RCM users greater accessibility than ever before. Authorized users can securely access data from any place, at any time — remote offices, temporary locations, clinics, physician offices, or even from home. All that is required is a login and an internet connection; no software is ever required to be installed on client PCs.

### General Benefits

- » **Flexibility:** Support operational requirements with a client-defined application that can be customized.
- » **Workflow:** Improve process effectiveness and user performance via workflow management.
- » **Automation:** Improve accuracy and efficiencies in productivity via automation using a sophisticated rules engine that reduces user intervention.
- » **Business Intelligence:** Convenient reporting that can deliver real-time and ad-hoc information for a wide variety of ever-changing user requirements.
- » **Consolidation:** Provides a single, accurate source of information across the enterprise.
