

# Keane Executive Dashboard

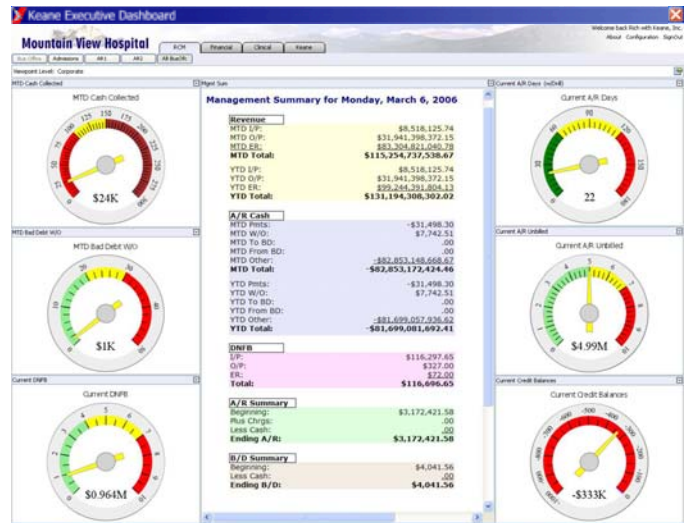

Business Intelligence On Demand

## Who says you can't always get what you want?

With Keane's Executive Dashboard Information System, business critical information is ready on demand. Keane's Dashboard puts you in the driver's seat to make informed decisions by providing an accurate snapshot of your organization's performance with drill-down capabilities. It takes reporting to a new level by visually representing key business indicators in easy to understand graphs, gauges, and charts. The Executive Dashboard is a powerful enhancement to your Keane systems, providing a new level of management information brought right to your desktop.

The Dashboard's customizable console presents exactly what you want to know, when you need to know it. Key business indicators, such as current AR days, total census vs. available beds, and patient mix, can be viewed by department, facility, or business unit; trended over time; or displayed as a comparison or aggregate of data across an enterprise. You choose the criteria and the type of view – the Dashboard does the rest of the work, presenting the results in real time via a web browser.

This powerful toolset is the ideal solution for large enterprises and small hospitals alike, transforming data into business intelligence. The Dashboard offers corporate viewpoints, regional viewpoints, as well as single facility views.

Business intelligence is ready on demand, visually presented in a graphical environment. Customize your console with key business indicators that display performance at a glance.

## Business Intelligence for:

### Healthcare Executives

Receive an instant snap shot of the organization's performance at a glance.

### Directors

Get an overview of department or business units performance, plus drill down for details.

### Clinicians

Personalize the way you receive information with multiple views of pertinent patient information on a single screen.

## Built on a Solid Foundation

Keane's Executive Dashboard is built on Cyberscience Cyberquery (CQ) technology, Keane's easy to use, business analysis and reporting solution. The Dashboard uses the strength of CQ behind the scenes to tap into your Keane systems and deliver your data right to your desktop.

The Dashboard can be accessed via Internet Explorer or while logged on to your Keane HIS, making it the right solution for both executives and department heads. Built-in security controls grant access to Dashboard views based on user login.

# Information On Demand

While the Dashboard is completely customizable, it comes equipped with several pre-defined views to get you up and running in no time. The Dashboard's standard template views provide a well-organized access point to information on revenue cycle performance, financial status, and clinical findings. Easy tab navigation guides you from one page to the next. Click on a tab to display performance indicators for that discipline. Each indicator view is titled for easy identification. Click on an indicator view to drill down even further using completely customizable parameters.

## Revenue Cycle Management

The RCM Console offers business critical views of Business Office, Admitting, and Accounts Receivable performance.

### Business Office sample views
